## SOFTWARE DEVELOPER I

Location: Remote/Virtual/Work from Home, USA

### **Why Management Computer Services?**

Management Computer Services (MCS) is a SaaS (Software as a Service) company that combines the best of both worlds – the stability of a growth-oriented software, with the connectedness of a family-owned business - which contributes to the pillars of our success. By serving our industry for 50+ years, we have established ourselves as a pioneer in affordable housing software, giving our employees confidence in both the security and longevity of MCS. At the same time, MCS is a family owned-and-operated business, which puts you in the heart of a dedicated and supportive team. Our goal is to ensure that as we evolve and grow as a business, so do our employees! We do this by equipping our teams with advanced tools, training, and career opportunities. This, in turn, produces cutting-edge solutions, strategies, and support for our clients, allowing MCS to keep our spot as an industry leader in affordable housing software.

We work in a collaborative, energetic, results-oriented environment that recognizes and rewards exceptional performance. Our goal is to ensure that as we evolve and grow as a business, so do you as an employee.

### **About the Role:**

Imagine this, waking up and your commute is from your bed to your home office, you're in the comforts of home, while working alongside top level developers that are helping and challenging you to grow your skills. All while gaining experience working for an industry-leading company. Sounds great, right?

As a Software Developer I at MCS, you will play a key role in developing our software, which is used by over 725 Housing Authorities across the United States. You will use your growing knowledge of software development, in collaboration with your problem-solving skills, to ensure our customers are provided with an optimal, user-friendly software experience.
